

High speed Internet, throughout your primary or secondary school, is a win-win for all involved. Wireless technologies now allow you to have high speed and secure Internet throughout your classrooms, libraries, and remote/temporary buildings. And those new technologies offer substantial benefits to all who work and attend the school.

ADMINISTRATION

Student reporting: With classroom applications available to track progress, your student reports are easier.

Increased security: Monitor the security of your buildings as well as that of your Internet connection.

Emergency response: Have the ability to contact all staff in case of emergencies.

IT

Easy installation: Locations where wiring was impossible can now be online.

Single pane of glass: A dashboard enables easier and quicker changes to the system.

Easy management: Non-IT staff can help manage the system; auto adjustment of the power and channel settings of the radio frequencies for easy load balancing.

High security: Autodetect and disable unknown access points; utilize a high level of user role definitions including group, application, location and time of day.

Simplified policies: Integrate with directory database for assigning user roles.

Connects the past to the future: Tie into existing WLAN systems, then ensure scalability so the investment is future-proof and can rapidly scale as needed

TEACHERS

Increase interaction: Encourage more collaboration between teachers and students.

Additional resources: Access online instruction and online testing, multimedia applications, and be able to use tablets, netbooks and digital whiteboards in the classroom.

Administration access: Reach admin staff in real time for questions, reports or emergencies.

STUDENTS

More collaboration: Enable more students to have Internet access; benefit from more group projects with peers and teachers.

Digital resources: Increase the research they can do, reach more students with a wider variety of teaching methods.

ABOUT INNOVEX

Technology is at the heart of every business organization. We are the single source developed to support your entire technology infrastructure, from your document systems to your servers — our focus is you.

Whether you use our Technology Products, Managed Services, or IT Professional Services, our integrated offerings simplify your business' operations, giving you the efficiencies you value. We stay current in technology that constantly changes, and are committed to providing you service excellence.

A 50-year-old independent, locally-owned company, we're also one of the fastest-growing companies.* We are here for you now and will be in the future.
